

*Jeff and Sara
Davis Family*

Hello!

We are the Davis family!

Thank you for taking time to learn about us!

We are excited to be adopting and bring more children into our family. We are seeking adoption because we feel our family is not finished and

I have chosen not to carry another child. We love watching and supporting each child. To see them grow and what they choose to be, by the time they are ready to leave on their own. That is a true miracle.

We want to give them whatever is needed to help them pursue their dreams. We hope our story can help you make your choice. Please

know that no matter what you choose, we wish you and your child/children the best. We know that your choice is what's best for your child. We hope this book gives you a glimpse of our family.

Meet Jeff

When Jeff was growing up he would work at figuring things out. For example; his mom gave him a broken hand mixer to throw away. He asked if he could keep it. He took it and fixed the wiring, attached helicopter blades to it, then made it fly. Like a drone but way before it's time. His desire to figure things out, eventually took him through college and to a career in engineering where he's worked for many, many years. Jeff loves being with his family. His kids are his pride and joy. He will do anything to be with his family. Swimming, gardening, boating, camping, football, tennis, basketball, board games, puzzles, hiking are all in his life and he loves them because of his family. Family is key to each activity!

Meet Sara

Sara is from a large family. She's number 4 of 13 children. This has instilled the nurturer in her since she was little. She became like the second mom to her siblings. They each fell in love with her. At our wedding, her younger sibling was 2 years old. He was so attached that he wanted to be carried around the whole day. She had cake, boogers, and tears at knee height on her wedding dress from her younger brother. She always wanted to have a large family. Sara loves her family. She is up for anything her family wants to do. Hanging out with her family and in the sun is where she loves to be. Gardening, boating, swimming, tennis, hiking are all activities she loves because it puts her in the sun and with her family. She has two convertibles just to drive around in the sun with her family

4 Generation

We have 8 kids. They range in age from 21-3 years old. Each has brought new things into our lives. Tennis, cross country, associates degree earned in high school, skipping grades, hiking, board games, orchestra, piano, guitar, dance, Pokémon, desire to travel, a love of zoo's, have all been added into our lives by our kids. We love them. There is Grant (21), Paige (20), Lauren (18), Susann (15), Alan (13), Kevin (8), Hazel (5), and George (3). Each of our children have a strong family bond.

About Us

They look after and care for each other. Since family is high priority for us, our kids have taken to this also. Education, extra curricular activities, and agency is high on our parenting style also. We want each child to know and feel they are of worth.

Their ideas, agency, and happiness is important to us. We instill each one of these values into their lives daily. They become what they want to be, while being open to accepting new ideas, and accepting all people around them

THE *Davis Family*

Our Children

“Match made in heaven or by divine intervention” is what has been said about Jeff and I. We were married in November, 1998.

George

Our oldest is Grant (21). He was born three months early. He has many diagnosis. The major one most people see is his Cerebral Palsy. He can not walk so he uses a wheel chair. Then Paige (20). She plays the piano, cello, and tennis and recently graduated high school as the valedictorian with an associate degree and is now serving a mission for our church. She hopes to become an occupational therapist. Lauren is next (18). She runs cross country, plays tennis, piano, and the violin. She's a senior in high school this year and will be graduating with her associates degree in the spring. After high school, she plans on serving a mission for our church and pursuing a career in teaching. Specifically, she loves history and orchestra. Susann (15) plays tennis, cross country, beginning to learn guitar and taking collage courses. She's finding the computer program classes fun and enjoyable. Alan (13) loves playing with his siblings. Nintendo, Pokémon, and visiting zoos or national parks are his interest.

Hazel

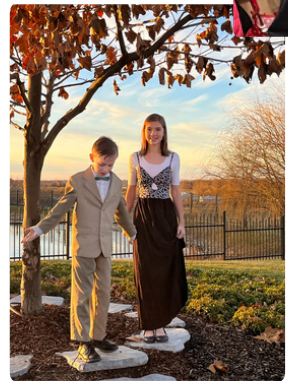

We play a movie quoting game at the dinner table every night. Alan loves making people laugh by quoting funny parts of movies during dinner. Kevin (8) started tennis this year. Last year he ran his first 5k. He is so proud of his run. He loves being on the boat tubing or knee boarding. Hazel (5) started first grade this year. She skipped kindergarten. Even before she could talk she would constantly bring me books to read to her. So as soon as she could talk I taught her to read. Now she's reading at a 2nd grade level. She loves learning new things. George (3) is fun and all boy. This year he figured out how to drive the power wheels Jeep and 4 wheeler. He loves keys, driving, puzzles and music. His playing includes “hooking up trailers” and playing music. Which includes blowing on recorder, strumming guitar, playing ethereal drum and fingering the piano.

Our Home

Our home sits on an acre between two larger cities. It has an large main living room. This is where we gather as a family, to eat, cook, bake, watch movies, read together. We have dinners every night together. The older kids have taken a love of food by cooking and baking for themselves. Family movies are watched with many different types of popcorn. Books like: Micheal Vey, Land of Stories, Percy Jackson, and Fablehaven are some of the favorite series we read. The game room is used for gaming. Jeff is a strong foose ball player. I love air hockey. Grant loves table top Pool, and Paige loves Ping Pong. In this room we also have a large table for puzzles and board games. We like to have friends over for game night. In the back yard there is an indoor swimming pool, hot tub, basketball, trampoline, swing set, playhouse, track, garden, a climbing tree, a fire pit, a separate apartment, and storage for our camp trailer and boat. The track goes around the pool house. The kids like to ride bikes, roller skate, run, and drive Hot Wheels around it for fun!

Christmas

Our Promise

We are very excited to be adopting. We feel growing our family is right for us. Please always know we will unconditionally love and cherish your child as our own. We will make sure that they know and feel proud to be adopted. We would love to have an open adoption. Your choice is always what is best for your child/children. We hope you enjoyed this look into our lives. Thank you for taking time to read this.

Sincerely,
Jeff and Sara Davis Family

Thank you
